

**Amendments to the Claims**

This listing of the claims will replace all prior versions and listing of claims in this application.

**Listing of Claims**

1. (Previously presented) An uncoated tablet comprising:
  - from 20 to 45% by weight enrofloxacin;
  - from 18 to 35% by weight of lactose;
  - from 5 to 10% by weight microcrystalline cellulose; and,
  - from 5 to 20% by weight of meat flavor.
2. (Withdrawn) Process for producing tablets according to Claim 1, in which
  - a. Enrofloxacin, lactose, where appropriate meat flavour and also, where appropriate, additional adjuvants are mixed,
  - b. The mixture is granulated in the added presence of water or aqueous solutions of additional adjuvants,
  - c. This mixture is dried,
  - d. After drying, microcrystalline cellulose and, where appropriate, additional adjuvants and also meat flavour, provided this was not added in step (a), are admixed,
  - e. And the mixture is subsequently pressed into tablets.
3. (Previously presented) An uncoated tablet consisting of:
  - a. from about 20 to about 45% by weight enrofloxacin;
  - b. from about 18 to about 35% by weight lactose;
  - c. from about 5 to about 10% by weight microcrystalline cellulose;
  - d. from about 10 to about 40% by weight of maize starch;
  - e. from about 1.5 to about 4% by weight polyvinyl pyrrolidone;
  - f. from about 0.05 to about 0.3% by weight colloidal silicon dioxide;
  - g. from about 0.4 to about 1% by weight magnesium stearate; and,
  - h. from about 5 to about 20% by weight of meat flavor.
